# Bengisu Halezeroğlu

## Product Strategist & Senior Product Designer

London, UK · Turkish and US dual citizen
bengisuhalezeroglu@gmail.com · linkedin.com/in/bengisu-halezeroglu · bengisuhalezeroglu.com

### PROFILE

Strategist and designer who enjoys making complex problems simple, with 8 years at Bank of America and Citi, moving from analytics into UX and launching investing products at Citibank. I combine user-centered design, strategic thinking and a curiosity for emerging technology to create intuitive digital experiences that work for both people and businesses.

Particularly interested in fintech, B2B SaaS and AI-powered products, where thoughtful design can make complex workflows clearer, more useful and more human.

### EXPERIENCE

**Founder, Designer & Consultant | studio seba** Self-employed · Sep 2025 – Present

*Helping startups and businesses turn ideas into practical digital solutions through product strategy and design, rapid app development and AI business innovation.*

- AI product strategy and design: defining product direction and designing AI-powered products, from B2B platforms to consumer apps.
- Rapid app development and prototyping: building functional prototypes, lightweight apps and MVPs to bring ideas to life quickly.
- AI strategy and business innovation: identifying opportunities to apply AI, improve workflows and develop practical technology solutions.
- First client CereHive, an AI-native B2B recruiting platform: took the product from 0 to 1.

**MSc Management and Technological Change, Distinction | King's Business School** London · 2024 – 2025

*A full-time master's chosen to add the business strategy of new technologies to an analytics and design background.*

- Thesis on how product managers use AI, where it automates their work and where it augments it, and how it should be used.
- Modules included Change Management and New Technologies, Design & Responsible Innovation, Design Sprint, Organisations & Emerging Technologies, Research Methods for Management & Technological Change, and Work Practice and Technology.

**Senior Product Designer, Wealth | Citibank** New York · Jun 2021 – Jun 2024

*Lead designer for Citi Self Invest (self-directed investing) and Citi Wealth Builder (Citi's first robo-advisory product) across mobile and web.*

- Led the end-to-end redesign of Citi Self Invest, which drove 70,000+ new accounts and a 15% increase in customer satisfaction, and contributed to AUM growth of over $2.2B.
- Designed Citi Wealth Builder Plus from zero to one, creating onboarding, suitability and funding journeys. Launched with 500+ accounts and $8M+ AUM growth in 6 months, with onboarding completion held at 80%.
- Designed the Fund Screener, lifting search-to-selection conversion from 10% to 40%, with 30% of Self Invest users adopting it within 3 months.
- Partnered with Compliance and Legal on disclosure content design, maintained the wealth design system and component library, and mentored and managed designers on the team.

**Product Designer, Enterprise Business Intelligence | Bank of America** New York · Aug 2020 – Jun 2021

- Designed internal business intelligence products used daily by Legal, Risk and Compliance at a consumer bank serving 60M+ clients.
- Raised System Usability Scale scores from 70 to 90 and cut time spent locating complaint data by 50%.

**Analyst, Enterprise Capital Management | Bank of America** New York · Jan 2016 – Jan 2020

- Mapped a manual capital management process end to end, found where data and handoffs broke down, and worked with engineers to redesign it as an automated reporting tool.
- Cut the cycle from 10 days to 3, with zero restatements across 48 submissions.

## SKILLS

**Product strategy.** Zero-to-one product definition, problem framing, success metrics, prioritization and roadmapping, experimentation and A/B testing, aligning stakeholders across the business, Compliance, Legal and Risk, presenting to senior leadership.

**Research.** User interviews, personas, journey mapping, usability and concept testing, design sprint facilitation, research synthesis, designing with cultural context in mind.

**Design.** Interaction and visual design, high-fidelity comps, interactive prototyping, design systems and component libraries, accessibility (WCAG), content design for regulated and sensitive subjects, mobile and web.

**Data and analytics.** Product analytics and funnel tracking, dashboard and reporting design, turning complex data into views each team can act on. Background in economics and capital management analysis.

**AI products.** Designing AI-native B2B SaaS, human-in-the-loop patterns for AI features, building working prototypes with Claude Code and AI coding agents, AI adoption in product teams (the subject of my MSc thesis).

**Tools.** Figma, Claude Code, Lovable, Mixpanel, Jira, Confluence.

**Languages.** English and Turkish, both native.

## EDUCATION

**MSc Management and Technological Change, Distinction** | King's Business School, King's College London 2024 – 2025

**UX Design Immersive** | General Assembly, New York 2020

**BA Economics** | University of Pennsylvania · Minors in Health Care Management and Neuroscience 2011 – 2015
